

E-Mail Shuttle™ for Scalix

E-Mail Shuttle for Scalix is an industry proven mail utility designed to migrate e-mail, attachments, calendars, contacts, folders, directories and mail lists from one or more legacy systems to Scalix 9.1 or greater. E-Mail Shuttle can migrate to and from virtually all e-mail platforms while maintaining the integrity of each message.

Scalable, Proven Architecture

Since its introduction to the marketplace in 1995, E-Mail Shuttle has successfully performed e-mail migrations for organizations Worldwide. The E-Mail Shuttle provides a solid migration solution for small businesses with as few as 10 users, to larger projects with more than 500,000 users.

Performance Driven

E-Mail Shuttle has the ability to migrate data 5 times faster than the standard free migration wizard. Its modular architecture enables the extraction and loading of e-mail data to occur as separate processes; providing maximum flexibility for incorporating e-mail migration into current processes.

Reliable, Accurate Conversion

E-Mail Shuttle provides complete address conversion in message headers, calendars and groups, ensuring all messages can be forwarded and replied to post migration.

Parallel Migration Support

E-Mail Shuttle supports parallel installations of the migration console enabling multiple servers to extract and load simultaneously - significantly reducing migration time.

Unique Migration Projects

Our goal is to meet the needs of our customers. We can customize the E-Mail Shuttle to meet your unique project goals so please contact us to see how we can provide a solution for your complex migration. Contact Inware Technologies, Inc. at: 239-384-9335.
